Jump combinations and the jump sequence consist of two (2) jumps. In the jump sequence the second jump must be an Axel type jump with a direct step from the landing curve of the first jump into the take-off curve of the Axel jump. One full revolution on the ice between the jumps (free foot can touch the ice, but without weight transfer) keeps the element in the frame of the definition of a jump sequence. Jumps executed in a jump sequence receive their full value. No triple or quadruple jumps are allowed. Only one single jump and one double jump (including Double Axel) can be repeated once.

b) There must be a maximum of two (2) spins of a different nature (abbreviation), one of which must be a spin combination and one must be a spin with no change of position and no change of foot. The spin combination with a change of foot must have a minimum of eight (8) revolutions and without a change of foot with a minimum of six (6) revolutions. Flying entry is allowed. If with change of foot, only one level feature per foot will count. The spin in one position without change of foot must have a minimum of six (6) revolutions, must be done in a basic position without any difficult variation positions and will be called maximum level basic. After the required revolutions it is allowed to execute difficult variations, but these will be ignored by the Technical Panel. Flying entry is not allowed.

c) There must be a maximum of one (1) step sequence fully utilizing the ice surface and including at least one skating movement such as a spiral, spread eagle, Ina Bauer, hydroblading etc. If the skating movement is missing, no Level will be given.
